Executive Summary

The @ease wallet is a digital product offered by Stanbic IBTC Bank with offerings targeted at the unbanked, underbanked, and multibank customers. It is accessible through a mobile app, USSD, and Debit Cards across Nigeria.

In 2026, the record of active mobile phone subscribers in Nigeria sits at about 179.6 million, unique Bank Verification Numbers at 67.8 million, and unique National Identity Numbers at 125million. These numbers indicate a massive opportunity for financial inclusion, streamlined transactions, and enhanced security in digital payments.

The widespread adoption of mobile wallets could help bridge the gap between traditional banking and the unbanked population, enabling smoother peer-to-peer transfers, and bill payments. Additionally, with increasing fintech innovation in the country, digital wallets have the potential to revolutionize commerce, making payments faster and more convenient across sectors.

The @ease wallet proposition is designed to offer simple, easy to use, multilingual, online real-time, affordable and easily accessible banking services using e-channels.

Product Description

The Stanbic IBTC @ease wallet is designed to offer financial solutions to unbanked, underbanked and multibanked customers through e-channels and authorized Agent locations.

The product objectives are:

- ✓ Promote flexibility in product offerings to suit customers' basic transaction and lifestyle needs
- ✓ Reduce cost to serve across the business by providing a convenient "self-service" means of transacting that ensures these customers do not need to visit our bank branches
- ✓ Achieve low-cost customer acquisition, retention, and deposit generation
- ✓ Provide cross-sell opportunity to existing customer base
- ✓ Serve as an entry product for customer acquisition that can be upsold to higher value products in future
- ✓ Enhance our retail brand footprint

The @ease wallet is a savings account and does not support creation of loans.

@ease Wallet Product Value Propositions – as is

The following represents the current features of the @ease wallet product available to customers:

- Verve debit card (issued at prevailing card issuance fee as stipulated in the guide to bank charges)
- Send and receive money to and from any financial institution in Nigeria
- Access to transaction services including airtime/data purchase, electricity and bill payments or *909*9# and the @ease module via the Stanbic IBTC Mobile App
- Tier 1 wallet maximum daily transaction limit of N50,000.00 (outflow) and maximum cumulative deposit limit of N300,000.00
- RaiseMe
- Option to create a Tier 1 wallet with either a BVN and/or NIN
- Push Notification and In-app Notification
- Existing users can create wallet for others
- Enable customers to manage beneficiaries for repeat transactions (save beneficiary)
- Self-service debit card activation
- Flat interbank NIP transaction charge of N10 + VAT (subject to business review and competitive landscape).
- Debit cards which support secure web-based transactions, including e-commerce and digital services. To ensure safe and compliant web-based payments, standard authentication measures will be implemented in alignment with existing security protocols

@ease Wallet Product Value Propositions – upcoming features and functionalities

Target Customer Profiles and Pain Points

The @ease wallet product will serve the following target customer profiles:

1. Youths (Students) – Age band 18 to 35 years old

Laide

Demographics

Student/Early Career Starter, female

Age: 18 – 30 years

Income: < 500,000 NGN per annum
(allowance or Hustle based)

Location: Nationwide

Industries: Education

Target Orgs: Universities, Polytechnics,
Technical Colleges, NYSC Camp

Regional Focus: Nationwide

Behavioral Attributes

Interaction Preferences – what are best ways to reach our persona?

- **Campus Presence:** They are most active at on-and-off campus and NYSC Orientation Camps.
- **Omnichannel Reach:** They rely on a mix of social/online media, emails, SMS, and push notifications for updates
- **Event-Based Engagement:** They are highly concentrated at university-hosted events like fresher orientations, matriculations, convocations, and sports events.
- **Professional Growth:** They can be reached during career-focused training workshops and seminars.

Content Preferences – what are preferred content types to reach our persona?

- **Video First Strategy:** They heavily favor videos and influencer-led content over static or long form text.
- **The "Peer" Factor:** They trust user testimonials and references from other students more than traditional corporate messaging.
- **Promotional Hooks:** Their engagement is triggered by active deals, reward campaigns, and direct financial benefits.

Content Sources – what are preferred sources our persona uses to stay abreast of information?

- **Digital Dominance:** Their primary windows to the world are social media and various online media platforms.

Emotive Attributes

Description – a tertiary student transitioning toward financial independence who feels the need to stretch her allowance while relying on parents, guardians, or sponsors for her upkeep; she is emotionally driven by a desire for simple, intuitive banking.

Key Requirements – what are the basic things our persona needs to have:

- Can operate a mobile phone
- Has school certificate in English
- Social media presence, at minimum WhatsApp
- Has a Bank Verification Number (BVN) or National Identity Number (NIN)

Pain Points – what pains drove our persona to seek a solution:

- **KYC Barriers:** Difficulty providing formal utility bills or high-level IDs for standard bank accounts.
- **Transaction Costs:** High sensitivity to SMS fees, "Not-on-Us" ATM fees, and transfer charges.
- **Accessibility:** Does not want to visit a physical branch or spend airtime on a help center call.

Goals – what are the goals, needs, and solutions our persona is seeking:

- **Instant Receipts:** Ability to immediately share proof of payment to vendors or friends via WhatsApp.
- **Social Payments:** An efficient way to receive "urgent 2k", allowances from parents and payments from side hustles.
- **Rewards:** Earning airtime bonuses or cashback for every transaction made through the wallet.
- **Web-based payments:** Convenient way to pay for music and video streaming subscriptions, and e-commerce purchases

IP2

Nnamdi

Demographics

Student/Early Career Starter, Male

Age: 18 – 30 years

Income: < 500,000 NGN per annum primarily
dependent on allowances from
parents/sponsors or side hustles.

Location: Nationwide

Industries: Education

Target Orgs: Universities, Polytechnics,
Technical Colleges, NYSC Camp

Regional Focus: Nationwide

2. Young Apprentices

Musa

Demographics

Apprentice, male in informal trade apprenticeship

Age: 18 – 35 years

Income: < 1,000,000 NGN per annum

Location: Rural and Urban Areas

Industries: All

Target Orgs: Business Operators (Auto Technicians, Plumbers, Carpenters, Tailors, Electricians, Trade etc.)

Regional Focus: Nationwide

Behavioral Attributes

Interaction Preferences – *what are best ways to reach our persona?*

e.g. neighborhood cluster activations, entertainment road show campaigns and promotions, religious events, training workshops, trade association meeting, radio, television, online news platforms and message broadcast.

Content Preferences – *what are preferred content types to reach our persona?*

e.g. physical demos, hand bills, videos, peer testimonials, local languages and radio advertisements.

Content Sources – *what are preferred sources our persona stay abreast of information?*

e.g. WhatsApp broadcast, Facebook, SMS messages, known influencers, word of mouth, radio, television.

Emotive Attributes

Description – adult female currently enrolled in an informal trade apprenticeship scheme. He is driven by the weight of being dependent on a guardian or sponsor for his living allowances and upkeep for an agreed-upon duration. This creates a strong desire for financial autonomy and the eventual transition into self-employment.

Key Requirements – *what are the basic things our persona needs to have:*

- Can operate a mobile phone
- Understands basic English communication.
- Has a Bank Verification Number (BVN) or National Identity Number (NIN)

Pain Points – *what pains drove our persona to seek a solution:*

- Complex KYC requirements, specifically the need for utility bills for address verification to be a major barrier to entry.
- Secured alternative to physical bank visits or calling help centers, which she views as a waste of time and resources.
- Savings solution with interest payment towards specific goal

Goals – *what are the goals, needs, and solutions our persona is seeking:*

- **Entrepreneurial Ambition:** His primary emotional motivator is the need to save enough to establish his own business.
- **Group Solidarity:** She looks for safe, convenient, and rewarding group savings schemes that align with the communal nature of trade yards.
- Additional income stream that requires little time

95

- ✓ OPAY- Wallets rapidly acquired through an aggressive market entry strategy, driven by price leadership for accessibility and affordability
- ✓ Palmpay - Wallets come pre-installed on Tecno, Infinix and Itel phones which are under the same ownership to enhance accessibility
- ✓ Moniepoint – wallets are acquired through an extensive agent network, leveraging on-the-ground presence to drive adoption by individuals seeking reliable digital payment solutions
- ✓ Paga - driving adoption through mobile-first accessibility, leveraging a strong presence in digital and agent-based financial services to expand reach and simplify transactions for users across various channels
- ✓ MoMo - leveraging MTN's extensive mobile network to drive adoption, strategically integrated with telecom services for seamless financial transactions, accessibility, and widespread user engagement
- ✓ FirstMonie - Wallets acquired largely through default wallet creation for Bank customers
- ✓ @ease - Wallets acquired largely through Partnerships, Eco-Cluster Market activations, Agents, Campaigns

Conclusion

Despite recent regulatory developments, the mobile money business continues to hold great potential for financial inclusion and delivery of a one-stop financial platform for underbanked and multi-banked customers.

The Stanbic IBTC @ease wallet is going through a major developmental phase that will position it for growth along the lines of scale, user experience, and velocity.
